

IN THE CLAIMS:

Please replace the following claims with the new versions seen below:

A2 *45* *B1*
1. (Amended) A film sheet for use with overhead projectors consisting essentially of a cellulose ether.

2. (Amended) A film sheet for use with overhead projectors as claimed in claim 1, wherein an ink-jet printer can be used to directly print at least one of characters and pictures thereon.

Please add the following new claims:

feels this is structural
A3
17. (New) An overhead projector transparency medium comprising:
an overhead projector transparency film sheet, wherein the film sheet is adapted to receive ink directly from an ink-jet printer, wherein the film sheet consists essentially of a cellulose ether, and wherein the film sheet consists of one layer.

18. (New) The film sheet of claim 17, wherein the transparency medium consists of one layer, the one layer being the same layer as the transparency film sheet.

sub *B2*
19. (New) The film sheet of claim 17, wherein said cellulose ether is a cellulose ether that that when placed in 2 ml of an aqueous solution obtained by mixing 0.1 part by weight of the cellulose ether with 99.9 parts by weight of water at 20°C, the number of undissolved fibers having a length of 8 to 200 μm is not greater than 1,000.
